PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and shipping production features across web and mobile platforms using React, React Native, Node.js, and Express. Brings additional depth in IT systems administration, open-source project development, and AI/ML from academic work. Comfortable across the full stack and in Agile team environments.

EDUCATION

Northern Michigan University

Bachelor of Science, Computer Science.

Marquette, MI

May 2025

EXPERIENCE

Full Stack Developer

June 2025 – August 2025

Northcross Group

Marquette, MI

- Developed and shipped 5+ production features across web and mobile applications using React, React Native, JavaScript, Node.js, and Express.
- Built and maintained REST API endpoints and backend services supporting client-facing application functionality.
- Collaborated with developers, designers, and project stakeholders in an Agile environment to deliver software features from design through deployment.
- Debugged application issues, implemented fixes, and improved overall application reliability and user experience.
- Participated in code reviews, testing, and deployment activities to maintain code quality and application stability.

IT Director

August 2022 – Present

Lake Superior Hospice

Marquette, MI

- Direct organization-wide technology operations, infrastructure, and software systems.
- Administer Microsoft 365, Windows Server, networking, endpoint security, and vendor-supported business applications.
- Implement technology solutions to improve operational efficiency, security, and reliability.
- Automate internal processes and technical workflows to reduce manual effort and improve consistency.

PROJECTS

ForceBoard Metrics <https://github.com/lgundry/forceboardmetrics-linux>

- Built open-source force plate software that converts a Wii Balance Board into a biomechanics analysis tool via Bluetooth.
- Implemented real-time sensor data streaming, calibration, and center-of-pressure calculations using NumPy and SciPy.

Senior Capstone: AI Math Symbol Interpreter

<https://github.com/lgundry/Math-Symbol-Analyzer>

- Developed a neural network-based system that recognizes and analyzes handwritten mathematical symbols using Python, NumPy, and PIL.
- Implemented an encoder-decoder architecture with dual pathways for image reconstruction and symbol classification using softmax.
- Built a Tkinter-based GUI for real-time demonstration of model inference.

SpringerSim <https://github.com/lgundry/SpringerSim>

- Assumed ownership of an open-source ski jump design and simulation application built with C# and .NET.
- Refactored user interface components and improved overall application performance.

SKILLS

Languages: JavaScript, Python, Java, C++, SQL, C#

Frontend: React, React Native, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Tools & Technologies: Git, GitHub, Linux, Agile Development, SQL Databases

IT & Systems: Microsoft 365, Exchange, Windows Server, System Administration
